My Resume

A quick snapshot of my journey, skills, and the places I've learned and grown.

📋 Summary

- Strong foundation in core education studies, with experience in subject-based teaching practice and educational research projects.
- Basic academic research skills, including literature review, questionnaire and interview design, and data analysis.
- Skilled in organizing activities, coordinating with different people, and working towards shared goals.

💼 Experience

Trainee Teacher

2025.09 — 2025.12

Baijiahu Primary School

- Independently designed diverse interdisciplinary teaching activities; took charge of borrowing, collecting and sorting teaching resources. Delivered over 50 interdisciplinary lessons across 12 classes, effectively boosting pupil engagement.
- Conducted lesson observations and teaching research activities in line with the national mathematics curriculum standards; analysed new textbook content and compiled ten teaching reflection reports.
- Developed twenty mathematics teaching plans independently around core learning objectives; delivered six mathematics lessons with interactive courseware, and ensured smooth curriculum handover with the class teacher.

Participant

2024.05

China International College Students' Innovation Competition

- Engaged in empirical research on the digital transformation of rural industrial sectors, identified innovative pillars and authored the executive summary for the project proposal.
- Synthesized and analyzed extensive market research datasets; leveraged Excel for data visualization to provide evidence-based insights, leading to the project's approval at the college level.

Undergraduate Thesis

2025.12 — 2026.06

- Conducted an empirical study on classroom participation in Grade 3 mathematics classes. Reviewed literature, developed the research framework, and designed observation forms, questionnaires, and semi-structured interview guides.
- Collected and organized research data through classroom observations of 227 students across five classes, 46 student questionnaires, and semi-structured interviews with five mathematics teachers.

- Transcribed, coded, and conducted thematic analysis of teacher interview data. Identified patterns and influencing factors in students' classroom participation, providing evidence for the research findings and recommendations.

🎓 Education

Xi'an Jiaotong Liverpool University

2026.09

Master of Science · Digital Education

- **Core Modules:** Introduction to Research Methods, Designing Digital Educational Curriculum, Fundamentals of Machine Learning

---

Jiangsu Second Normal University

2022.09 — 2026.06

Bachelor of Education · Primary Education (Mathematics)

- **Core Modules:** Probability Theory and Mathematical Statistics (90), Modern Educational Technology (88), Linear Algebra (98)

🛠️ Skills

Language	Description
Chinese	Native speaker, Mandarin Level 1-B
English	IELTS 6.5 (6.0). Able to quickly skim and filter English articles. Possess good academic English listening, speaking, reading and writing skills, with basic academic English writing and Chinese-English translation capabilities.

Tools	Description
SPSS	Able to conduct statistical data analysis, including reliability and validity testing, correlation analysis, and interpretation of quantitative research findings. Produce statistical results to support academic research and evidence-based decision-making.
Trae	Able to use AI-assisted coding to develop simple applications, automate tasks, and build interactive tools. Produce functional prototypes and digital solutions based on specific needs.
PowerPoint	Able to design structured and visually engaging presentations to communicate research findings, project ideas, and key information. Produce presentation slides for academic reports, project proposals, and group presentations.
Word	Able to prepare and format academic and professional documents, organize research content, and structure written reports. Produce research papers, literature reviews, project proposals, and formal reports.
Excel	Able to organize, clean, manage, and analyze data, as well as use formulas and charts to identify patterns and present findings. Produce structured datasets, data summaries, visualizations, and analytical reports.
